Sprint 1 Report
CryptoTracker
CryptoTracker Developers
Start Date: January 22, 2018
End Date: February 4, 2018

Actions to Stop Doing:

We need to learn how to keep our scrum meetings within 15 minutes. Solving problems should be kept outside of the scrum meetings.

Actions to Start Doing:

We need to start being transparent as to what tasks we are doing, so we can avoid merge conflicts. We have set up the environment, so now it's time to start coding and working on the web app.

Actions to Keep Doing:

We have been good when it comes to meeting up, so we should keep our schedule.

Work Completed/Not Completed:

We managed to set up the API calls to track the price of Bitcoin, although we still haven't been able to do the rest of the cryptocurrencies. We all played around with React and set up some test applications in order to get familiar.

Work Completed:
- *User Story 1:* As a user, I want to track the price of Bitcoin.
- *User Story 2*: As a developer, I want to learn pertinent technologies such as React.

Work Completion Rate:
- Number of User Stories Completed in sprint: 2
- Total number of estimated ideal work hours: 2 hours per member, 10 hours total
- Total number of Days in sprint: 13
- User Stories per day: 0.15 Stories per day
- Ideal work hours per day: 0.77 hours per day among all members total, 0.15 hours per day per member
